

Indusil SQX6 Silicone

Description

Indusil SQX6 silicone is a solution of a silicate material in an aromatic solvent. It is an excellent candidate to consider as a component in polyurethane mold release formulations or as a surfactant to help stabilize PVC plastisol foam.

Key Features and Typical Benefits

- Excellent film former for uniform release properties throughout the mold
- Increased durability of release effect
- Highly effective with virtually all types of substrates
- Effective at low concentrations
- Easy to formulate
- Good heat resistance
- Soluble in a variety of solvents and in a number of silicone oils

Typical Physical Properties

Properties	Unit	Value
Appearance	-	Colorless liquid
Active Content	%	60
Density (25 °C / 77 °F)	g·cm ³	1.044
Solvent		Xylene
Flash Point - closed cup	°C / °F	29.4 / 85

Typical properties are average data and are not to be used as or to develop product specifications.

Potential Applications

- Component of polyurethane mold release formulations
- Component in release formulations for virtually all types of substrates, especially those that need good film formation such as tires and bladders, and metal dies such as aluminum die casting and others.
- Component of PVC plastisol foaming formulations

General Considerations for Use

Typical concentrations of Indusil SQX6 silicone in the final formulation range from 2 to 10% depending on the desired effect to be achieved.

Indusil SQX6 silicone is soluble in aliphatic and aromatic solvents and in polydimethylsiloxanes. It is not soluble in water, in certain mineral oils or in certain organic waxes.

Indusil SQX6 silicone is soluble in aliphatic and aromatic solvents and in polydimethylsiloxanes. It is not soluble in water, in certain mineral oils or in certain organic waxes.

The ability of Indusil SQX6 silicone to stabilize plastisol foams is related to its solubility in the plasticizer. Therefore the interaction between Indusil SQX6 silicone and the plasticizer should be tested at different concentrations to determine the levels required to achieve the desired effect.

Patent Status

Product Safety, Handling and Storage

Customers should review the latest Safety Data Sheet (SDS) and label for product safety information, safe handling instructions, personal protective equipment if

necessary, emergency service contact information, and any special storage conditions required for safety. Momentive Performance Materials (MPM) maintains an around-the-clock emergency service for its products. SDS are available at www.momentive.com or, upon request, from any MPM representative. For product storage and handling procedures to maintain the product quality within our stated specifications, please review Certificates of Analysis, which are available in the Order Center. Use of other materials in conjunction with MPM products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

Limitations

Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.
