

## SAG™ 831

### Description

SAG 831 silicone foam control agent is a high-performance antifoam emulsion to be considered for water based foam control in the oil and gas industry, such as in gas sweetening or well unloading applications.

### Key Features and Benefits

- Excellent durability in acidic or alkaline conditions.
- May be considered for well-unloading or gas sweetening applications and in completion fluids.
- Outstanding durability at low add-on levels.
- Performs effectively at low use levels.
- Excellent foam control at ambient and elevated temperatures.
- Rapid foam knockdown.
- Virtually no oily spots or agglomerates when diluted with cold water.
- Easily dispersible in hard water.
- Good compatibility with salt solutions or high ionic strength systems.

### Typical Physical Properties

| Property                      | Unit                             | Value               |
|-------------------------------|----------------------------------|---------------------|
| Appearance                    | -                                | Milky, white liquid |
| Solids Content, %             | -                                | 45                  |
| Density at 25°C               | g•cm <sup>-3</sup>               | 1.03                |
| Emulsifier Type               | -                                | O/W, non-ionic      |
| Viscosity 25°C (77°F)         |                                  |                     |
| Brookfield LVT No. 3, 30 RPM) | mm <sup>2</sup> •s <sup>-1</sup> | 2000                |
